Weighing was perfer pre-calibration. Weighing was performed at the plant's warehouse, by weighing the cargo bags one by one bag on

Prior to weighing, the scales were zero-tested and verified by us and found to be in normal working condition.

Weighing was conducted under our supervision and the results were as follows:

300600 KG (as found) Total Gross Weight

Total Tare Weight of bags : 600 KG (as calculated)

: 300000 KG (as calculated) Cargo Net Weight

We randomly weighed some empty bags and got the average tare weight of each bags was 2.0kg. As the hang scale didn't have the calibration certificate, the results for reference only.
